EXAMINER

TRAN, SUSAN T

ART UNIT PAPER NUMBER

1615

DATE MAILED: 02/17/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<p align="center"><b>Office Action Summary</b></p>	<b>Application No.</b> 09/876,704	<b>Applicant(s)</b> MROZINSKI ET AL.	
	<b>Examiner</b> Susan T. Tran	<b>Art Unit</b> 1615	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 28 October 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1,4-10,12-15,18-33 and 35-72 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,4-10,12-15,18-33 and 35-72 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

Receipt is acknowledged of applicant's Notice of Appeal filed 08/03/04, Request for Continued Examination filed 09/23/04, and Amendment filed 10/28/04.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/23/04 has been entered.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4-10, 12-15, 18-33, 35-72 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,638,611 ('663). Although the conflicting claims are not identical, they are not patentably distinct from each other because '663 claims an oil absorbing wipe suitable for wiping a users skin comprising oil absorbing porous film of a thermoplastic material having a transparency of less than 65% wherein said porous film changes transparency when loaded with oil. The skin cleansing agent is found in claim 12. The interstitial volume is found in claim 13. The void content is found in claim 14. The filler is found in claims 15-17. The average particle size of the porous film voids is found in claim 18. The melt-blown web of thermoplastic fibers is found in claim 20. Polyolefin microfiber is found in claim 21. Therefore, those of ordinary skill would expect a similar oil absorbing wipe suitable for wiping a users skin from the teaching of the instant invention given the claims of US '663. There are no unusual and/or unexpected results, which would rebut prima facie obviousness. As such, the instant claims would have been obvious given the claims of US '663, which set out a similar wipe using the same materials and ingredients.

Claims 1, 4-10, 12-15, 18-33, 35-72 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,645,611 ('664). Although the conflicting claims are not identical, they are not patentably distinct from each other.

Claims 1, 4-10, 12-15, 18-33, 35-72 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the

claims of copending Application No. 10/001,094. Although the conflicting claims are not identical, they are not patentably distinct from each other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 25, 29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 is indefinite in the use of the phrase "30 percentage points". What are percentage points?

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4-10, 13-15, 18-25, 28-33, 37, 38, 41-55, 57-66, and 69-72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kondo et al. WO 99/29220.

Art Unit: 1615

Kondo teaches oil absorbing sheet comprising porous plastic film sheet, e.g., polypropylene, polyethylene, polybutylene, ethylene-propylene block copolymer, or poly-4-methylpentene; and coating, including about 20-60% fillers, e.g., mineral oils, and other additives (pages 4, and 6-7). The porous film sheet has interstitial volume in the range of 0.0001-0.005 cm<sup>3</sup>, void content in the range of 5-50%, the thickness in the range of 5-200µm, and oil absorption per unit of up to 3.78 mg/cm<sup>2</sup> (pages 5, 8, and 14-22). Other additives in the coating include surface- active agent and hydrophilic polymer, e.g., polyvinyl alcohol, and polyethylene glycol; and wherein the coating can be on a single or both surfaces of the film (pages 9-11). Kondo does not specifically teach the transparency of less than 65 percent. However, Kondo teaches excellent transparency, notable transparency enabling easy confirmation of oil absorption (page 8 and examples). Accordingly, absent showing evidence on the contrary, the transparency taught by Kondo is at least the same as the claimed transparency. Therefore, it would have been *prima facie* obvious for one of ordinary skill in the art to, by routine experimentation obtain the claimed invention because Kondo recognizes the same results desired by the applicant, e.g., excellent absorption of the skin oil, notable transparency, suitable to absorb large amount of sweat and skin oil on the face (page 1).

Claims 12, 26, 27, and 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kondo et al., and Sugiyama et al. US 4,643,939.

Kondo is silent as to the teaching of polyolefin microfiber and salicylic acid. However, it is the position of the examiner that polyolefin is of the same polymer group

Art Unit: 1615

as polypropylene, and therefore, it would have been obvious for one of ordinary skill in the art to, by routine experimentation select a suitable thermoplastic film and a suitable organic acid with the expectation of at least similar result, because Kondo teaches thermoplastic film material including polypropylene microfiber; filler, such as organic and inorganic acid.

Sugiyama teaches oil-absorbing tissue made of plant fiber, or mixture of plant fiber and synthetic resin fiber (column 2, lines 30-38). The sheet is coated with additives, such as salicylic acid (column 2, lines 39-68). Thus, it would have been obvious for one of ordinary skill in the art to modify Kondo's oil-absorbing sheet with the plant fiber in view of Sugiyama with the expectation of at least similar result, because the references teach the advantageous results in the use of oil-absorbing sheet. The expected result would be oil-absorbing sheet having excellent absorption of the skin oil, and notable transparency to enable easy confirmation of oil absorption and toughness.

Claims 35, 36, 39, 40, 67, and 68 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kondo et al.

Kondo is silent as to the teaching of the average pore size and the "Hand" of the sheet. However, absent showing evidence on the contrary, it is the position of the examiner that the oil absorbing sheet taught by Kondo would have at least similar pore size and "Hand" weight as the claimed pore size, because, Kondo uses the same thermoplastic film having the same physical properties, *e.g.*, void volume, interstitial volume, and thickness.

### ***Response to Arguments***

Applicant's arguments filed 10/28/04 have been fully considered but they are not persuasive.

Applicant indicates that in accordance with the Examiner's suggestion in the Advisory Action, the claims have been amended as suggested in the telephone interview of November 16, 2003. However, during the telephone interview, it was suggested to further clarify the active/additives to include agents disclosed in the specification at pages 13-14. Merely amend the claims to recite an active or skin modifying agent "*which can deliver a benefit to skin or hair*" does not place the claim in condition for allowance, because Kondo teaches additives such as salicylic acid, filler, organic acid, and mineral oil (see pages 6-7).

Furthermore, applicant has not addressed the 112, 2<sup>nd</sup> paragraph rejection, as well as the obviousness type double patenting rejections (see Final Office Action dated 05/05/04). Besides, claim 62 has not been amended to define the active or skin modifying agent.

### ***Correspondence***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan T. Tran whose telephone number is (571) 272-0606. The examiner can normally be reached on M-R from 6:00 am to 4:30 pm.

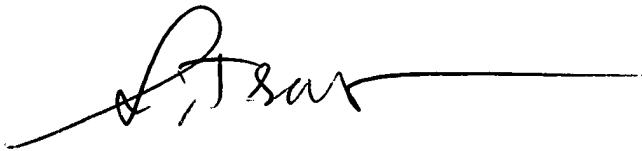

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page, can be reached at (571) 272-0602. The fax phone

Art Unit: 1615

number for the organization where this application or proceeding is assigned is (571) 273-8300.
